Local Plan for South Kesteven

Site Allocation and Policies Development Plan

Session 11: Monitoring and Implementation

15th November 2012
1: Do the Council’s proposed changes provide a robust Monitoring and Implementation regime?

1.1 Yes. The Council considers that the main modifications proposed to Section 5 of the SAP (SAPMM044 – 48) [SAP11] provide a comprehensive, clear and coherent monitoring and delivery framework that can be monitored through the Annual Monitoring Report. The identified trigger and actions/contingency measures to be employed in the event that delivery does not proceed as anticipated provide an effective approach to securing delivery of the Plan objectives.
