Please describe below why you consider the extent of the neighbourhood area proposed is appropriate:

The core village of Castle Bytham currently forms two distinct areas, divided by a disused railway line and disused quarry. The latter is the subject of a major housing development outline plan which will have a significant impact on the population and demographics of the Parish. The village has lost its previous Local Service Centre status but outline plans for additional housing and advanced plans for replacement shop and café will change that situation. Moreover, the existing 2 pubs and medical centre still make it a service focus for surrounding small settlements

The Parish has no listed roads but has significant east west through commuter traffic to and from the A1. Moreover, although the north south connections are very minor, in places single track routes, they are the shortest lines of communication to Grantham or Stamford. Development outside the core village would have a major impact on the already poor road connections. For this reason, it makes sense to consider the Parish as a whole unit.
